

Achieve Publication Success with Campus

Drafting and publishing a research paper can be a complicated process. Campus is a collection of courses that simplifies it. These 10 courses, created and reviewed by experts in each topic and delivered through an engaging format, guide researchers through the entire process, helping them achieve publication success and maximize the impact of their research.

Primarily designed for early-career researchers, the courses will also benefit experienced team members ready to update their skills.

Customer Benefits

- Develop researchers' writing and publishing skills
- Maximize the opportunity to publish research in high impact journals from the start of the researcher's career
- Provide trusted resources that support ethically sound research
- Receive monthly reports on course progress

Researcher Benefits

- Comprehensive education to improve writing for academic publishing
- Insights into international publication standards
- Work at an individual pace with flexible, self-timed and assessed courses
- Achievements validated with certification
