

COHERENT IMPACT · REAL-WORLD IMPACT INTELLIGENCE FOR RESEARCH

Show your researchers where their work shapes the world beyond the journal

Coherent Impact reveals how scholarly research is cited and used across policy, practice, and applied settings, tracking citations from more than **40,000 organizations** worldwide. It sits on top of the same preserved collections your library already trusts.

HOW IT FITS TOGETHER

Coherent Impact

The impact intelligence layer — tracing where and how your institution's research is cited, with full context.

BUILT ON TWO PRESERVED COLLECTIONS

Policy Commons

Primary sources in the applied social sciences, from governments, IGOs, NGOs, and think tanks.

Public policy

Health & social care

Urban governance

International development

Think tanks

World & local governments

Applied Science Commons

Reports, case studies, and technical documents across applied science and health, from hospitals, institutes, and standards bodies.

Environmental science

Nursing & allied health

Public & mental health

Computer & data science

Artificial intelligence

Technical standards

WHAT IT MEANS FOR YOUR LIBRARY

Extend beyond journals

Capture real-world policy and practice research your journal databases don't index.

Serve your whole institution

Give faculty tenure and grant evidence, and research offices the impact reporting they need.

Preserve at-risk content

Every source is preserved with a permanent identifier, so primary sources stay findable.

Support discovery

Rich metadata, permanent identifiers, and follow-and-alert tools help users track research.

40M+

preserved items and growing

40,000+

organizations citing research worldwide

Daily

updates for currency and reliability

→ AN EASY PLACE TO START

Already have Policy Commons or Applied Science Commons? Use the built-in **Mentions** tools to show faculty where their work already appears, then grow into Coherent Impact when you're ready.

≡ FLEXIBLE ACCESS

Available by subscription — and Policy Commons and Applied Science Commons can be **purchased outright** to reduce your subscription cost. Model pricing fits institutions of every size.

Real-world impact rarely starts in a journal. It starts in a city council report, a hospital guideline, or a think-tank brief — and your library can help researchers see all of it in one place.
